Subject: Antimicrobial and Antibacterial Agents Free Statement

To whom it may concern,

Hydrochloric Acid products manufactured by Detrex contains no biological material. The precursor materials used by Detrex do not contain any items from biological or human origins. In addition, due to the physical properties of Hydrochloric Acid, material such as bacteria, viruses, or toxins cannot survive exposure to our products. Antimicrobial and Antibacterial agents are not used by Detrex in the production and packaging of Hydrochloric Acid.

While we do not routinely test for these compounds, to the best of our knowledge we have no reason to suspect they may exist in our Hydrochloric Acid Products.

Sincerely,

A handwritten signature in blue ink, appearing to read "Jim Vence", is written over the word "Sincerely,".

Jim Vence  
Technical Director
