Subject: Bromine and Chlorine Based Compounds Free Statement

To whom it may concern,

Most Bromine and Chlorine based compounds, such as Pentabromodiphenyl ether, or 2-chloroisopropyl phosphate are used primarily as flame retardant compounds. These compounds are not used by Detrex in the production and packaging of Hydrochloric Acid.

While we do not routinely test for these compounds, to the best of our knowledge we have no reason to suspect they may exist in our Hydrochloric Acid Products.

Sincerely,

A handwritten signature in blue ink, appearing to read "Jim Vence", is written over the word "Sincerely,".

Jim Vence
Technical Director
Detrex Chemicals
