Subject: Latex Statement

To whom it may concern,

Some individuals can exhibit allergy sensitivity to the proteins in natural rubber latex (NRL) following repeated exposure to products containing NRL. Extensive testing by the FDA has found at least 13 different potential allergens within NRL.

Detrex Hydrochloric Acid products do not use any natural rubber latex (NRL) materials in the finished product, as a material in our production processes. To the best of our knowledge it is not a material used to manufacture the container we utilize to package our finished products.

Sincerely,

A handwritten signature in blue ink, appearing to read "Jim Vence", with a large, sweeping flourish extending upwards and to the left.

Jim Vence  
Technical Director  
Detrex Chemicals
