Subject: Perfluorinated Chemicals (PFCs) Free Statement

To whom it may concern,

Hydrochloric Acid is a chemical compound that exists as a liquid at normal storage conditions. It is not a wearable item, and is not treated for water repellency or stain resistance. Perfluorinated chemicals are not used in the manufacture or packaging of Hydrochloric Acid, and are not added by Detrex.

While we do not routinely test for these compounds, to the best of our knowledge we have no reason to suspect they may exist in our Hydrochloric Acid Products.

Sincerely,

A handwritten signature in blue ink, appearing to read "Jim Vence", with a large, stylized flourish extending from the end of the signature.

Jim Vence
Technical Director
Detrex Chemicals
