Subject: RoHS Compliance Statement

To whom it may concern,

Detrex does not manufacture any electronic or electrical equipment. Detrex ensures that all surplus or scrap electronic and electrical equipment we generate, including fluorescent light bulbs, computer equipment and screens, Chlorofluorocarbons, and lead acid batteries are properly disposed or recycled to prevent compounds such as; Lead, Mercury, Cadmium, Hexavalent Chromium, Polybrominated Biphenyls, and Polybrominated Diphenyl Ether from being improperly released into our environment.

To the best of our knowledge Detrex is in compliance with the requirements with the EU directive 2002/95/EC governing restrictions on certain hazardous material substances in electrical and electronic equipment, as well as the EU directive 2002/96/EC on waste electrical and electronic equipment governing recycling and recovery standards for material content from surplus electrical and electronic equipment.

Sincerely,

A handwritten signature in blue ink, appearing to read "Jim Vence", with a large, sweeping flourish that loops back under the name.

Jim Vence
Technical Director
Detrex Chemicals
